Nebraska and New Hampshire Breakthrough deaths

by Anthony of Boston

In Nebraska, just 8% of those who died of COVID-19 between May 5, 2021 and August 12, 2021 were fully vaccinated. The first COVID-19 death of someone fully vaccinated in Nebraska was reported on May 5, 2021. https://dhhs.ne.gov/Pages/Death-of-Fully-Vaccinated-Individual-Confirmed.aspx

As of August 11, 2021 Nebraska reported 17 COVID-19 deaths of those fully vaccinated. https://www.usnews.com/news/best-states/nebraska/articles/2021-08-11/nebraska-says-17-fully-vaccinated-people-died-since-january

Between May 5, 2021 and August 11, 2021, there were around 213 total COVID-19 deaths in Nebraska. https://news.google.com/covid19/map?hl=en-US&mid=/m/05fhy&gl=US&ceid=US:en

With 17 of those deaths being of those fully vaccinated, the result shows that only 8% of those who died of COVID-19 during that timeframe was fully vaccinated.

In New Hampshire as of July 7, 2021, it was reported that 8 fully vaccinated people have died from COVID-19 https://patch.com/new-hampshire/concord-nh/nh-dhhs-all-covid-19-deaths-after-full-vaccination-were-older-60

In New Hampshire as of August 3, 2021, 10 fully vaccinated people have died of COVID-19. https://www.wmur.com/article/small-number-of-breakthrough-cases-shows-effectiveness-of-vaccines-doctors-say/37214643

There were 21 total COVID-19 deaths in New Hampshire between July 7 2021 and August 3, 2021 https://news.google.com/covid19/map?hl=en-US&mid=/m/059f4

Nebraska and New Hampshire Breakthrough deaths

&gl=US&ceid=US:en

The math shows that only 10% of those who died of COVID-19 between July 7, 2021 and August 3, 2021 were fully vaccinated
